Registrations of new vehicles

	October 2026 (units / change r/r)	January-October 2026 (units / change r/r)
Passenger cars		
Electric	3443 ↓ -28%	27 847 ↓ -9%
Hydrogen	0 → -	0 ↓ -100%
Plug-in Hybrid	4741 ↑ +30%	45 721 ↑ +79%
Hybrid	27 496 ↑ +14%	261 652 ↑ +12%
Light Commercial Vans		
Electric	338 ↑ +14%	2409 ↑ +50%
Hybrids & Hybrids Plug-in	140 ↑ +39%	1146 ↑ +51%
CNG / LNG	0 → -	0 ↓ -100%
Motorcycles		
Electric	145 ↑ +146%	1277 ↑ +146%
Mopeds		
Electric	447 ↑ +50%	3973 ↑ +50%
Trucks over 3.5t GVW		
Electric	40 ↑ +300%	221 ↑ +89%
Inc. over 12t GVW electric	24 ↑ +700%	70 ↑ +79%
CNG / LNG	68 ↑ +89%	316 ↑ +101%
Buses over 3.5t GVW		
Electric	37 ↑ +23%	1036 ↑ +469%
Hydrogen	1 ↓ -93%	112 ↑ +229%
Hybrid	7 ↓ -77%	257 ↑ +162%
CNG / LNG	8 → -	35 ↓ -31%

Infrastructure

	October 2026 (units)	January-October 2026 (units)
Charging infrastructure		
Charging stations	+55	+1041
Charging points	+123	+2041

Overall state of charging infrastructure

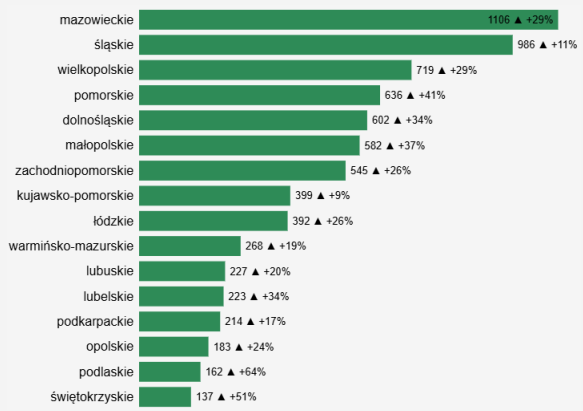

Charging stations	Charging points
7381 +26% (y/y)	14 692 +26% (y/y)

State of charging infrastructure over 100 kW

Charging stations	Charging points
1533 +80% (y/y)	3417 +68% (y/y)

Charging stations in each voivodeship

(units / change r/r)

Charging type

AC	50%
DC	43%
n.d.	7%

Charging connectors

IEC Type 2	49%
Combo Type 2	39%
Other	12%

Overall state of refueling infrastructure of hydrogen

Refueling stations	Refueling points
12	25

Overall state of refueling infrastructure of CNG & LNG

Refueling stations	Refueling points
63	153

NOTE: Registration data: PZPM based on CEP. Presented data can be updated. Infrastructure data: PZPM based on EIPA. We would like to inform that data delivered to users presents only widely available refueling/charging stations which obtained positive technical inspection and operator provided correct registration number.
